

# Connection plate type GP01

**description:**

Connection plate made of aluminum to convert a 1/4" NAMUR-interface into G1/4" threaded ports.

**type:**

G 1/4"

**construction:**

with countersunk mounting holes

**temperature:**

-20°C - +80°C

**Connection plate**

**body:**

aluminum

**seal:**

NBR

**temperature:**

-20°C - +80°C

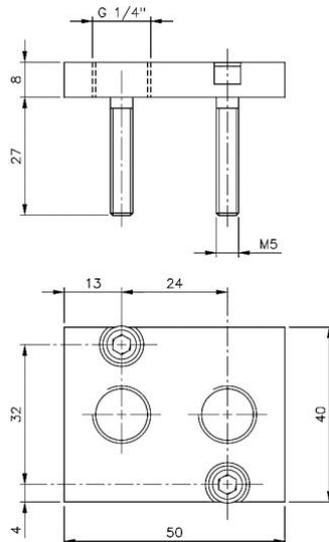

**features:**

Plate to convert a 1/4" NAMUR-interface into 2 x G 1/4" threaded ports for remote piloting, with countersunk mounting holes.

**Use:**

This plate can be used to convert a Namur valve into a threaded valve. It is used, for example, if the Namur valve may not or cannot be installed directly on the pneumatic actuator due to specific requirements. Screws and O-rings are included in the delivery.
